

# NUTRITION API :

The screenshot shows the RapidAPI interface for the Spoonacular Recipe - Food - Nutrition API. The browser's address bar displays the URL `rapidapi.com/spoonacular/api/recipe-food-nutrition/`. The API card features a green logo, the name "Recipe - Food - Nutrition", and a "Verified" badge. It lists the provider as "By David", the update date as "Updated 13 days ago", and categories as "Food" and "Featured in Food & Restaurant". Performance metrics are shown as "Popularity 9.8 / 10", "Latency 702ms", and "Service Level 100%". Navigation links for "Endpoints", "About", "Tutorials", "Discussions", and "Pricing" are present. The "Endpoints" section is expanded, showing a list of endpoints under the "Recipes" category, with "GET Search Recipes" selected. The description for this endpoint states: "Search through thousands of recipes using advanced filtering and ranking. NOTE: Since this method combines searching by query, by ingredients, and by nutrients into one endpoint, each request counts as 3 requests." A "Subscribe to Test" button is located next to the endpoint list. The "Code Snippets" tab is active, displaying a JavaScript code snippet using Axios to make a GET request to the API's complex search endpoint.

## Recipe - Food - Nutrition API Documentation

The spoonacular Recipe - Food - Nutrition API gives you to access to thousands of recipes, storebought packaged foods, and chain restaurant menu items. Our food ontology and semantic recipe search engine makes it possible to search for recipes using natural language queries, such as "gluten free brownies without sugar" or "low fat vegan cupcakes." You can automatically calculate the nutritional information for any recipe, estimate recipe costs, visualize ingredient lists, find recipes for what's in your fridge, find recipes based on special diets, nutritional requirements, or favorite ingredients, classify recipes into types and cuisines, convert ingredient amounts, or even compute an entire meal plan. With our powerful API, you can create many kinds of food and nutrition apps.

Special diets/dietary requirements currently available include: vegan, vegetarian, pescetarian, gluten free, grain free, dairy free, high protein, low sodium, low carb, Paleo, Primal, ketogenic, and more.

Search endpoints

**GET Search Recipes** Subscribe to Test

Search through thousands of recipes using advanced filtering and ranking. NOTE: Since this method combines searching by query, by ingredients, and by nutrients into one endpoint, each request counts as 3 requests.
