

ASSIGNMENT 4

Team Batch No: B6-6M2E

TEAM MEMBERS

1. MADESH K
2. SABARISH G
3. VISHNU BRAHMAN S
4. RAHULDRAVID M

TEAM ID: PNT2022TMID12789

Question 1:

Pull an image from docker hub and run it in docker playground.

```
2. The Docker daemon pulled the "hello-world" image from the Docker Hub.  
(amd64)  
3. The Docker daemon created a new container from that image which runs the  
executable that produces the output you are currently reading.  
4. The Docker daemon streamed that output to the Docker client, which sent it  
to your terminal.  
  
To try something more ambitious, you can run an Ubuntu container with:  
$ docker run -it ubuntu bash  
  
Share images, automate workflows, and more with a free Docker ID:  
https://hub.docker.com/  
  
For more examples and ideas, visit:  
https://docs.docker.com/get-started/

Question 2:

Create a docker file for the jobportal application and deploy it in Dockerdesktop application.

DOCKERFILE:

```
1 FROM python:3.8-buster
2
3 WORKDIR /app
4
5 COPY requirements.txt /app/
6
7 RUN pip install -r requirements.txt
8
9 COPY . /app/
10
11 RUN cp .env.dev.sample .env
12
13 EXPOSE 8000
14
15 RUN chmod +x entrypoint.sh
16
17 CMD ["sh", "entrypoint.sh"]
```

DEPLOYMENT OF JOBPORTAL APPLICATION:

Containers [Give feedback](#)

A container packages up code and its dependencies so the application runs quickly and reliably from one computing environment to another. [Learn more](#)

Question 3:

Create a IBM container registry and deploy helloworld app

or jobportapp.IBM CONTAINER REGISTRY

DEPLOYMENT:

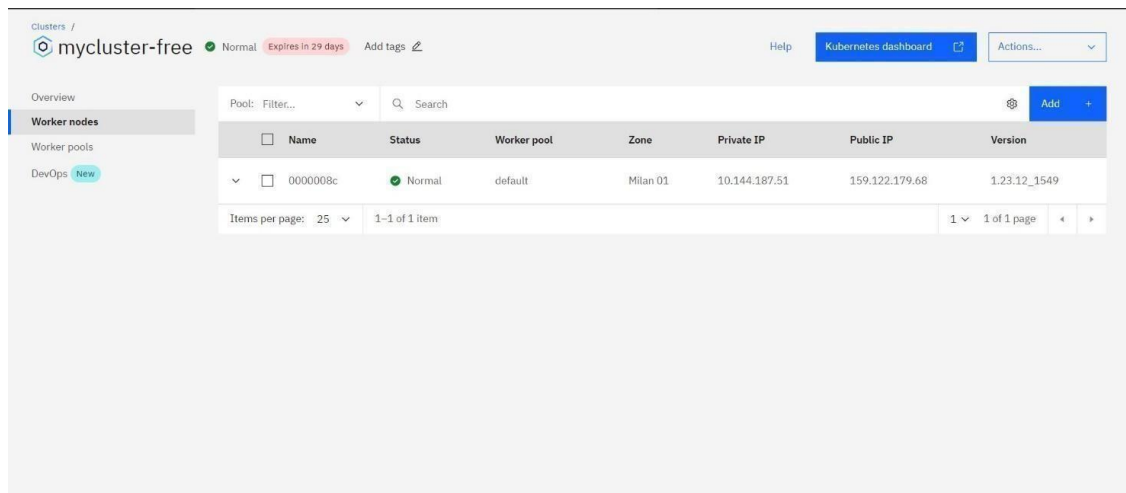

OUTPUT :

Question 4:

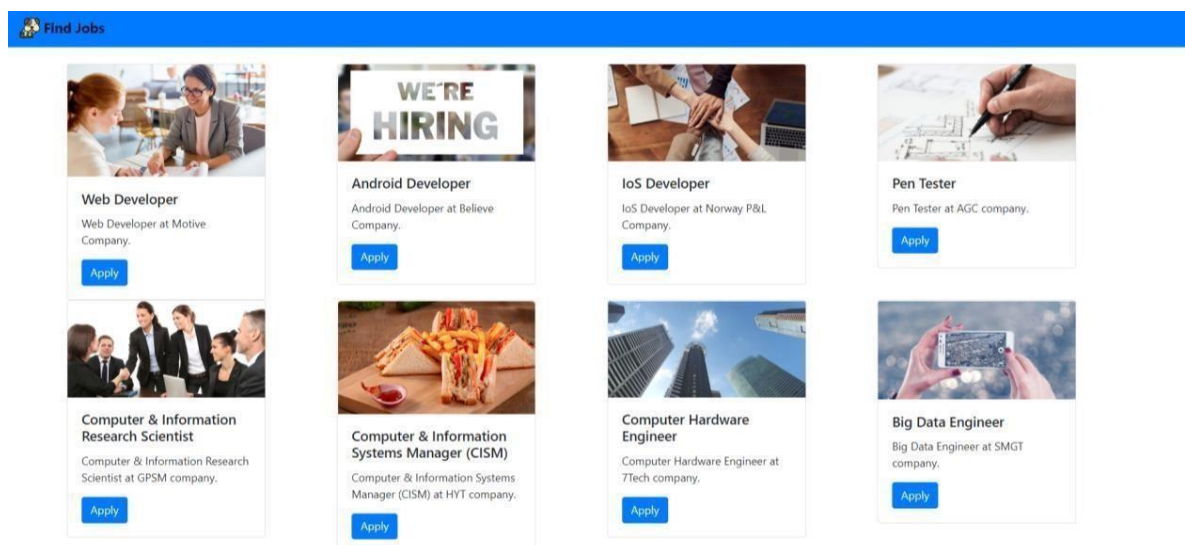

Create a Kubernetes cluster in IBM cloud and deploy helloworld image or jobportal image and also expose the same app to run in nodeport.
CREATING KUBERNETES CLUSTER IN IBM CLOUD AND EXPOSING NODEPORT:

The screenshot shows the IBM Cloud Clusters console for a cluster named 'mycluster-free'. The 'Worker nodes' tab is selected, displaying a table with one worker node. The node is named '0000008c', has a status of 'Normal', and is part of the 'default' worker pool. It is located in the 'Milan 01' zone. The private IP is '10.144.187.51' and the public IP is '159.122.179.68'. The version is '1.23.12_1549'.

Name	Status	Worker pool	Zone	Private IP	Public IP	Version
0000008c	Normal	default	Milan 01	10.144.187.51	159.122.179.68	1.23.12_1549

OUTPUT:

The screenshot shows a job portal website with a blue header that says 'Find Jobs'. Below the header, there are eight job listings arranged in a 2x4 grid. Each listing includes a title, a brief description, and an 'Apply' button.

Job Title	Company
Web Developer	Web Developer at Motive Company.
Android Developer	Android Developer at Believe Company.
IoT Developer	IoT Developer at Norway P&L Company.
Pen Tester	Pen Tester at AGC company.
Computer & Information Research Scientist	Computer & Information Research Scientist at GPSM company.
Computer & Information Systems Manager (CISM)	Computer & Information Systems Manager (CISM) at HVT company.
Computer Hardware Engineer	Computer Hardware Engineer at 7Tech company.
Big Data Engineer	Big Data Engineer at SMTG company.
